

Course Name: Introduction to Information and Communication Technologies		
Course Code: CS-111	Credit Hours: 3(2+1)	Semester: I

Course Outline:

- Introduction to Computer
- History of Computers
- Generations of Computers
- Classification of Computers
- Applications of computers
- Computer System
 - Computer Hardware
 - Input Devices
 - Output Devices
 - Computer Memory
 - Primary memory and its types
 - Secondary memory and its types
 - Central processing system (CPU) and its parts
 - Motherboard
 - Computer Software
 - System software
 - Application software
- Data communication
 - Modes of data communication
- Computer Networks
 - Network Types
 - Networks Topologies (Star, Mesh, Ring, Bus)
- Internet
 - A brief history of ARPANet
 - Services and issues of Internet
 - Website and Types of websites
 - WWW, Web browser, URL, and Email
 - E-commerce and its types
 - Collaborative Computing and Social Networking
- Virus, Anti-viruses, Anti-Malwares
- Introduction to Programming Languages
 - Low level Languages
 - Assembly Language
 - High Level Languages
- Database
- Database Management System
 - Advantages/Disadvantages of DBMS
- Numbers System
 - Binary Number System
 - Decimal Number System
 - Octal Number System
 - Hexadecimal Number System
- MS Word (Basic concepts and Features, creating, saving, editing, formatting and printing documents)
- MS PowerPoint (Basic concepts and Features, creating, saving, editing, formatting and printing Presentations)

Reference Materials:

1. *Introduction to Computers 6th International Edition*, Peter, N. McGraw-Hill
2. *Using Information Technology: A Practical Introduction to Computer & Communications*, 6th Edition. Williams, S. McGraw-Hills.
3. *Fundamentals of Information Technology*, Alexis L Mathewsleon Leon Press.
